

Hello,

In response to the RFP for Biomedical Services, El Rio Health has received a few questions. We would like to inform you of the questions and answers listed below:

- 1. Is there a pricing template for the vendors to utilize to present overall program price within the RFP response?**
 - a. Utilize Exhibit A, add a column for pricing.
- 2. Do we require price by facility or overall program price?**
 - a. By facility and an overall summary sheet please.
- 3. Should the pricing be preventative maintenance, only, with any associated labor rates for repairs?**
 - a. We would like it clearly outlined for PM's, and then the labor rates for repairs and new equipment calibrations, as well as any other potential costs to support the overall requests and requirements that we are looking for.
 - b. Please add any additional options as well that you may want to include as is outlined in the RFP.
 - c. If the program is large enough to have dedicated staffing, please present this pricing model as well.

We are looking forward to receiving the responses to the RFP for Biomedical Equipment Services.

Sincerely,
Candice Campbell
